Crayon	4	Tea	3
Earth (Dirt)	1	Urine	2
Excrement	2	Wine	1
Fruit Juices	3	Vomit	2 then 1

Fiber Protection Program

Amant's Fiber Protection Program is engineered to give the maximum protection against common spots, spills and soiling. However, no product is capable of making all textile fibers entirely stain proof.

Time is of the essence in maximizing the effect of stains coming in contact with the fibers. If a spot cannot be removed after using the cleaner or by using directions on the spot chart provided by Amant's, we will send our technician to treat the stain at no cost to the customer, providing the spot is no larger than eight inches in diameter. The stain must have been reported within 12 months of the last application of the protector.

The remedies provided by this warranty will be available only if Amant's is notified within 24 hours after the customer has complied with Amant's directions for cleaning the spot, stain, or soiling. "Stains" do not apply to areas affected by bleach or dye.

- Kevin Amant
